I

User/Employee Tan

1. Introduction :-

The Kai App is intended to be used primarily by Government Departments or designated organizational heads. It should be downloaded/installed directly from the App Store (iOS) or Play Store (Android). For convenience, a QR Code and direct download/install link are also provided below. The QR Code can be scanned using your phone's camera or a QR Code Scanner app to easily download/install the app.

Scan to Download from
PLAY STORE

URL Link (andriod)
<https://shorturl.at/ceqyV>

Scan to Get it from
APP STORE

URL Link (iOS)
<https://shorturl.at/eM068>

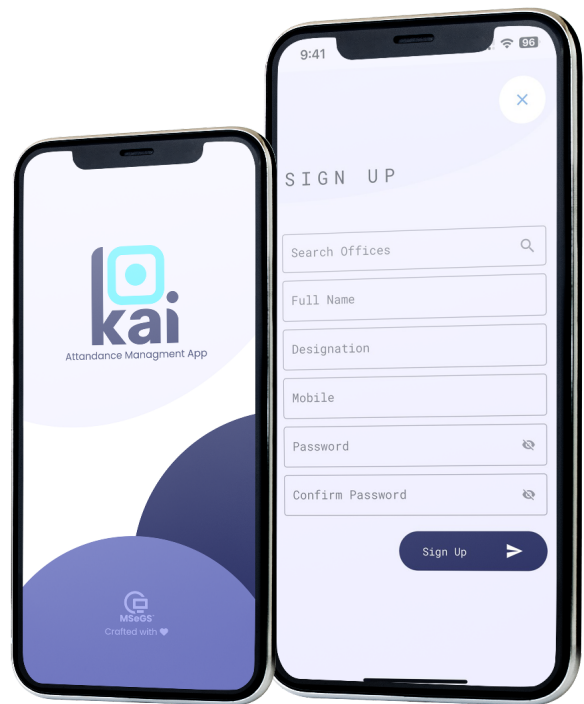

****Note :** “Kai” is a term from the Mizo language, and this app is named after various common uses of the word such as kai tha, kai kim, sikul kai, pisa kai.

This app was developed by the Mizoram State e-Governance Society in 2024 specifically for the Government of Mizoram, ensuring reliable and effective usage.

2. Register Dan:-

Once the app is installed, open the Kai app to access the Login page. If you're opening it for the first time, tap the "Register" button. New users must register using the same phone number they used for the eLEAVE portal (<https://e-leave.mizoram.gov.in>).

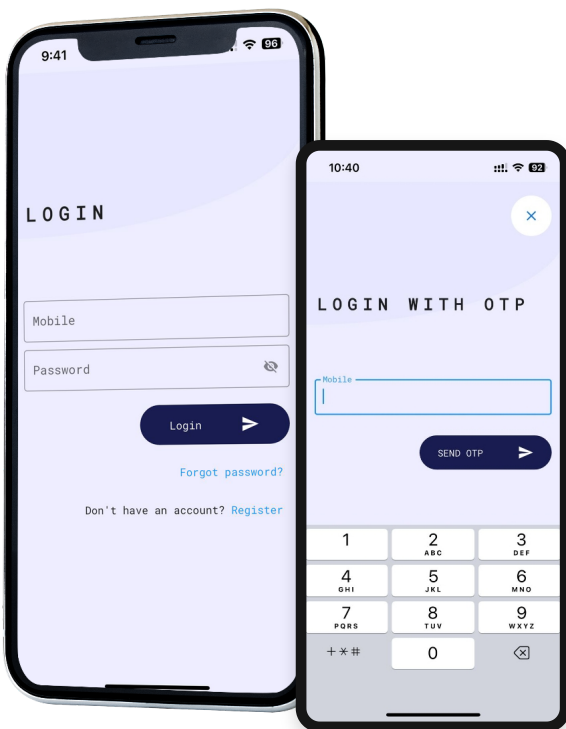

Select your office name, then enter your full name, designation, and password correctly. Finally, tap the "Sign Up" button to complete the registration.

3. Login Dan:-

Only users who have registered can log in. Login can be done either through the Mobile App or the Website. However, attendance can only be marked using the Mobile App. To log in, use the mobile number and password that were set during registration.

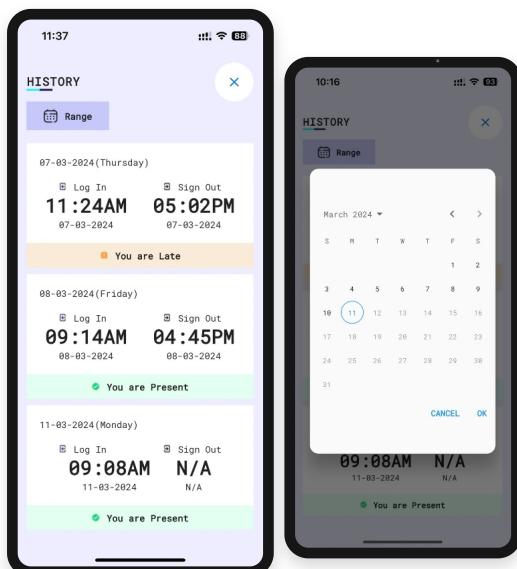

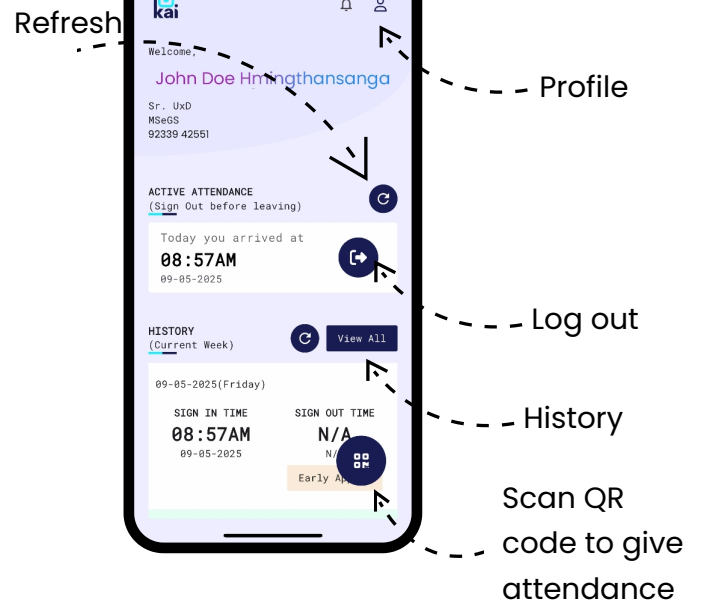

If you have forgotten your password, select the "Forgot Password" option and enter the mobile number you used during registration. Then click "Send OTP". An OTP will be sent to your mobile number via SMS. After entering the OTP, you can set a new password.

4. Dashboard :-

On the Dashboard, you will find options to update your user profile, view office entry times, access the QR Code Scanner for marking attendance, check office closing times, and view your attendance history.

To mark your attendance, tap the ****QR CODE SCAN**** icon and scan the QR Code displayed at your office or institution. This will record your attendance.

5. History :-

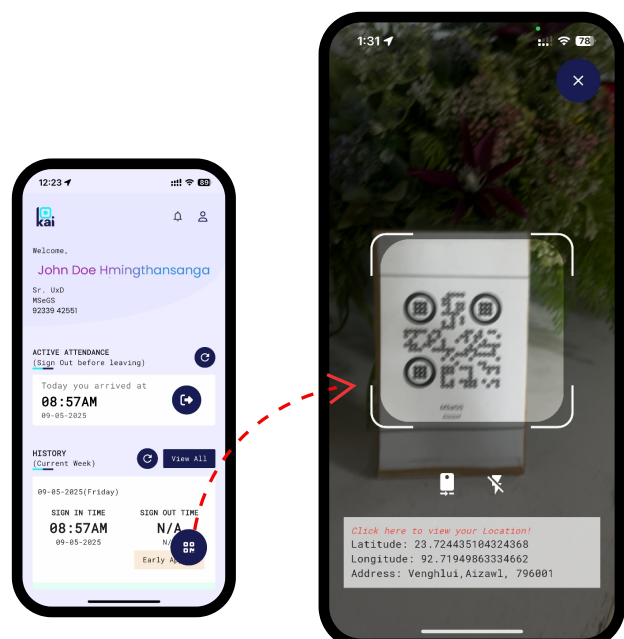

In the ****History**** section, you can view a complete record of your attendance. You can select a specific date range, and if you want to view details for a particular time period, that is also available.

6. Attendance :-

To mark your attendance, tap on QR Code Scan, and the camera will open. Align the QR Code within the square box on the screen to scan it.

To accurately record your location, make sure Location/GPS is enabled in your phone settings.

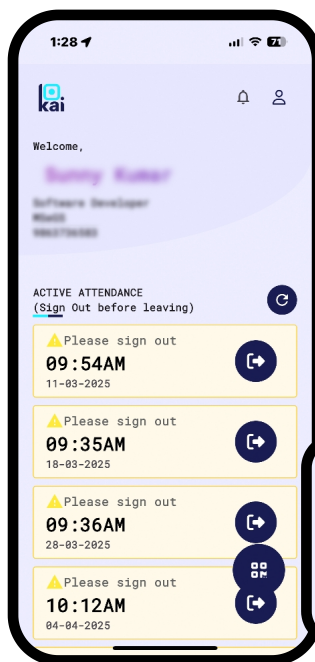

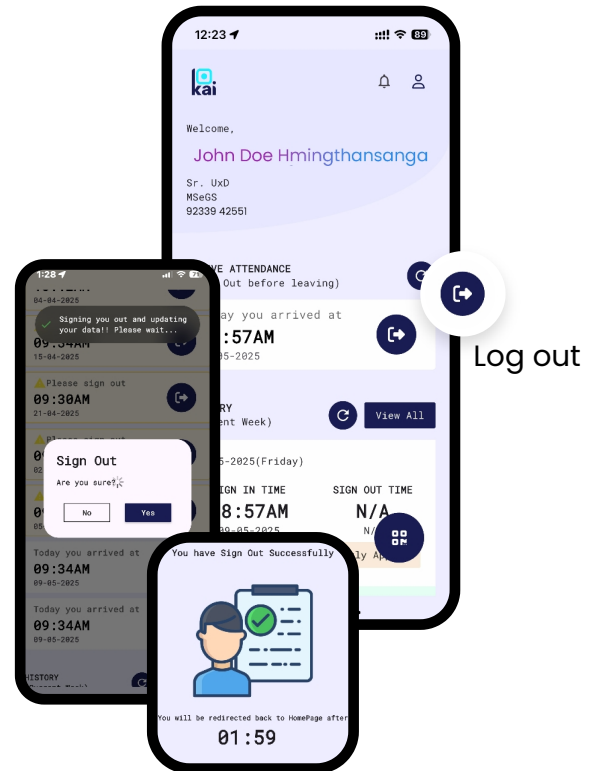

If you arrive late or leave early three times in a week, it may result in a deduction of Half Day Casual Leave.

7. Log Out :-

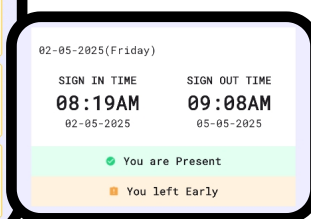

At the end of office hours, you should tap ****LOG OUT**** to record your departure time from the office. The office start and end times are set by GAD and may be adjusted from time to time.

For logging out, the system is designed with a short delay of one to two minutes to ensure proper processing. Therefore, all users are kindly requested to be patient during the logout process.

If you see a Sign Out option instead of Log Out, it means you haven't properly logged out after signing in.

You should always Log Out on the same day as signing in to ensure accurate attendance records. If you do not log out correctly, it will be treated as if you are still in the office, and your attendance will not be properly recorded.

*If you signed in in the morning but never logged out, your office hours won't be recorded correctly. Then, if you press ****Log Out**** later, the system will mark your status as ****"Early left"***, but the time records will still be incomplete.*

8. Notification :-

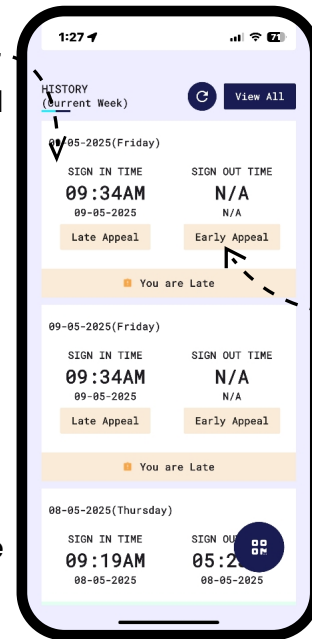

It means this is an important clarification for users to understand.

9. Appeal :-

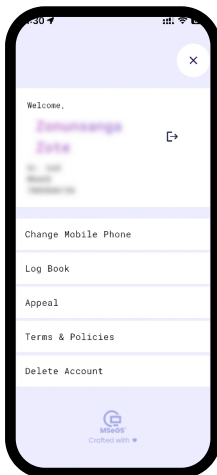

Late Appeal :- A Late Appeal can be submitted if you fail to mark your attendance on time during office hours. You can apply for it by providing valid reasons, which will then be reviewed and either approved or rejected. To submit a Late Appeal, click on the Late Appeal option and enter the details explaining your delay. The appeal will be reviewed and decided upon by the Approving Authority.

Early Appeal :- This can be submitted when you leave the office early or need to record an early departure for a valid reason. Similar to the Late Appeal, your reasons will be reviewed by the Approving Authority, who can either approve or reject the appeal.

Late Appeal

Early Appeal

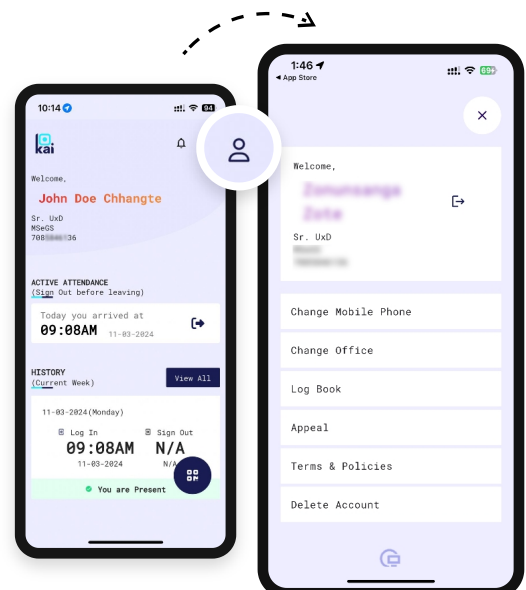

10. Settings :-

Late Appeal :- A Late Appeal can be submitted if you fail to mark your attendance on time during office hours. You need to provide valid reasons for your delay, which will be reviewed and either approved or rejected by the Approving Authority. To apply for a Late Appeal, click on the Late Appeal option and enter the details explaining your delay. The Approving Authority will then consider your appeal and make a decision.

11. Profile :-

On the **Profile** page, the **Change Mobile Phone** option allows you to deregister your current mobile device. If your mobile phone (device) is lost or no longer in use, you can submit a request to change it using the **Change Mobile Phone** feature. This request can then be approved or rejected by your Manager or designated authority.

The "Change Office" option is used when an employee is transferred to a different department or office.

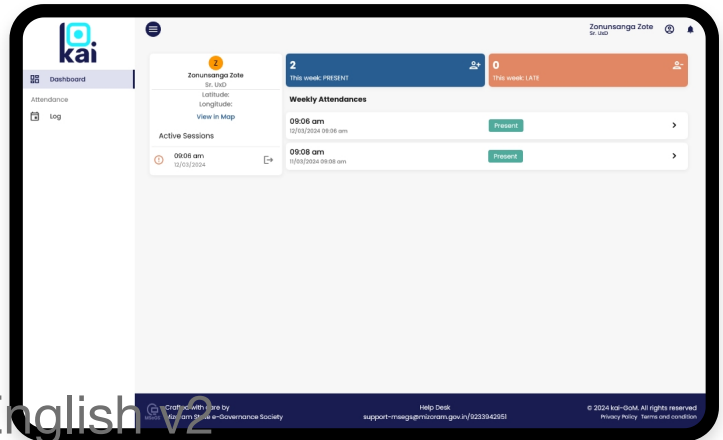

12. Desktop view for employee:-

Webiste Link

<https://kai.msegs.in>

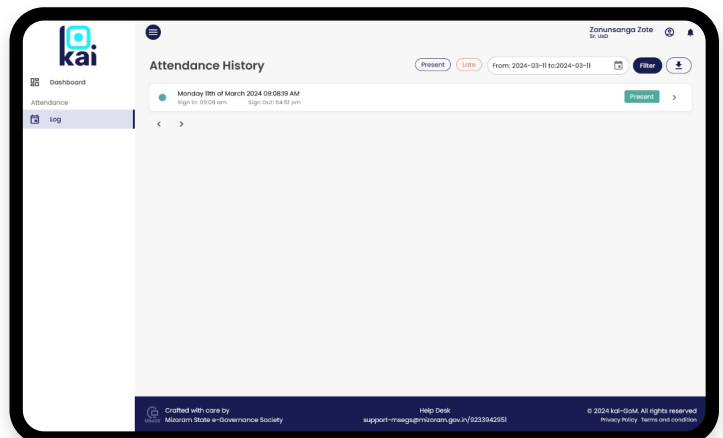

Employees/Users can also log in through the web portal. However, to mark attendance, logging in through the mobile app is required.

In desktop mode, the option to punch attendance by scanning the QR Code is not available. Only viewing attendance records and logs is possible.

13. Log

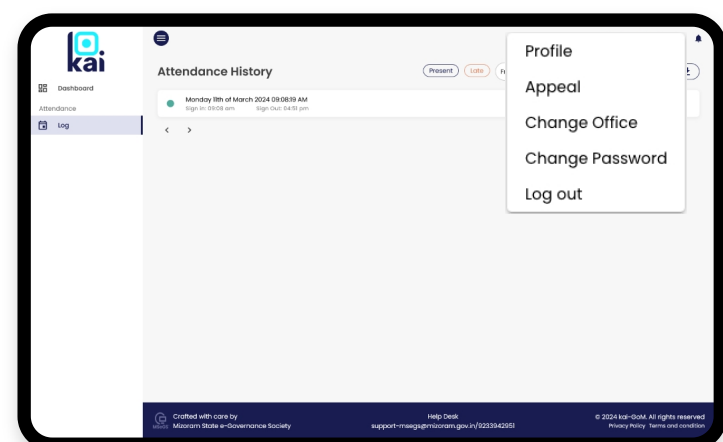

Employees can view their attendance records and also have the ability to see their entry (arrival) and exit (departure) times.

14. Change Office

If an employee transfers to a different department or office, they need to use the ****Change Office**** option.

This option is available on the web and mobile version.

****Note:** Kai Manager must be the one who is responsible for managing and approving Leave and Attendance matters within their Department or Office.
